

## Safety Covers

Kayden Manufacturing is proud to offer safety covers manufactured by the **original safety cover company**, Meyco. With more than 112 yrs of manufacturing experience and over 60 years of manufacturing safety covers it is the only safety cover good enough to be sold by Kayden Manufacturing.

For the **biggest savings** be sure to order your cover at the same time as your new liner. Ask your dealer for details.

## Deco-trim Package

Complete your pool's renovation with the selection of Kayden Manufacturing's color matching renovation system. With our Deco-trim package we will **color coordinate** your pool's skimmers, returns, and main drains to compliment your pattern selection. **Say goodbye to your plain old white fittings** that stick out like a sore thumb, and say hello to a completely color coordinated program. This package includes all new gaskets too!

You don't have to settle for plain old white fittings any more!

## VCS Slip-Stop Spray

VCS Slip-Stop Spray™ is the only field applied product specifically intended to reduce slip and fall accidents on vinyl covered steps. Kayden Manufacturing developed the product as a service to our dealers to help them push the limits on vinyl liner pool design. **We've made big tacky white steps a thing of the past.** Now your steps can look great with unparalleled slip protection.

At Kayden Manufacturing, we use only the highest quality 100% virgin vinyl. No cheap recycled materials are used in our liners. By insisting on using only the highest quality virgin vinyl we can be confident your Kayden Liner will out perform any using inferior materials found in some of our lower priced competitor's products.

Our motto: "Quality you can see. Quality you can count on", is incorporated into every facet of the service, design and production of everything we do. Each and every liner is meticulously designed and manufactured for superior fit and function. We use unique and proprietary state of the art design and manufacturing processes, producing one of the flattest, strongest and most attractive seams in the industry. Every seam is specifically designed to reduce the chance of dirt collection, improving the overall look and reducing the need for vacuuming.

The wall on a standard Kayden Liner is at least 35-40% thicker than our competitors' standard 20mil wall. Although this is slightly more expensive, our experience has proven it to be the best fitting and best performing. Our heavy-duty wall features proportionally more UV inhibitors, plasticizers and micro-biocides. In addition it is more resistant to damage from the sun, chemicals, ice, children and pets, and should last longer than any 20mil wall. Since there is virtually no life border stretch that is usually present on all standard grade walls, Kayden Liners look more attractive and less stretch means longer life. The option to upgrade your floor from a standard 20mil to a heavy-duty floor for added durability, is available for a nominal up-charge. The thicker floor material is an excellent choice when the pool will get heavy use especially from children and pets. It also helps mask minor imperfections like trowel marks in the pool floor under the liner. We highly recommend the thicker floor be used on all concrete or sand bottoms due to the more abrasive finish when compared to a vermiculite bottom.

All in all, Kayden Manufacturing offers the best options for maximum performance, appearance and durability in the industry!

All these great features plus one of the industry's longest and best warranties...
